TECHNICAL SKILLS

Languages: Java, C, C++, JavaScript, SQL, HTML, CSS

Frameworks/Libraries: React, Node.js, TailWind

Tools and Methodologies: Docker, Git, Agile, CI/CD

Relevant Course Work: Data Structures and Algorithms, Databases, Networking, Software Development Methods, Intro to Machine Learning, Computer Systems and Systems Programming, Probability and Statistics

PROJECT EXPERIENCE

Collaborative Study Helper | macOS Application

January 2026 - April 2026

- Built a macOS study application using SwiftUI and Supabase to support reinforcement learning
- Designed features for users to create and join classes and build shared question banks
- Implemented a customizable notification system that schedules question prompts by day and time
- Integrated push notifications to deliver spaced practice outside traditional study sessions
- Focused on improving study habits by integrating reinforcement learning into users' daily routines

Sustainabull | Gamified Sustainable Commuting App (Project Manager)

January 2025 - April 2025

- Integrated Geocode, Leaflet, and OpenRouteService APIs to enable interactive maps and real-time route generation.
- Implemented live location tracking to enhance user engagement through gamified features using JavaScript for the API integration and React and Tailwind for the frontend.
- Managed a 4-person team, planning and tracking project milestones for on-time delivery.

Umi | Task Management Web Application (Project Manager)

September 2024 - December 2024

- Built task management features via the Notion API, enabling users to add, edit, and delete tasks.
- Allocated tasks using a Work Breakdown Structure (WBS) to improve team coordination.
- Created a project schedule with defined milestones and deliverables.
- Assisted in debugging and issue resolution to maintain smooth project progress.

Java Maze Game | Spring Boot Application

September 2024 - December 2024

- Developed a maze game in Java and Spring Boot using the MVC architecture for modularity and scalability.
- Implemented RESTful APIs for efficient client-server communication and game logic handling.

WORK EXPERIENCE

STEAM and Tech Instructor | [Science Alive SFU](#)

May 2025 - August 2026

- Deliver hands-on STEAM and coding workshops for elementary students, adapting content to different learning styles
- Teach topics including Intro to Web Development, LEGO Spike, MakeCode Arcade, and Python
- Collaborate with instructors and program leads to run organized and engaging sessions
- Design lesson plans aligned with learning objectives, ensuring interactive and effective activities

Activity Leader | [YMCA BC](#)

June 2023 - Present

- Supervise and support children in before- and after-school programs, ensuring a safe and inclusive environment
- Plan and lead engaging activities tailored to different age groups and needs

LEADERSHIP EXPERIENCE

President | [Software Systems Student Society](#)

May 2025 - Present

- Lead a **15-person executive team** to plan and execute large-scale events, including **career fairs** and **hackathons**.
- Represent student interests by **collaborating with faculty and sponsors** to improve events and opportunities
- Oversee day-to-day operations, including budgeting, record keeping, and internal and external communications

Director of Events | [SFU Women in Computer Science](#)

May 2025 - May 2026

- Planned and executed community events promoting inclusivity in computer science
- Organized 15 social and professional events including workshops, game nights, and formal gatherings
- Collaborated with partner organizations to expand event reach and engagement

EDUCATION

Simon Fraser University | Burnaby, BC

September 2023 - September 2028

Bsc. Computer Science - Software Systems
